## Open Your Third Eye With MAGNETS

APRIL 25, 2014 / CONSCIOUSAWARENESSFORALL / EDIT

Many people are trying to find ways to fully open their **pineal gland** [third eye], but one person may have gotten more than he desired.

By using the north end of a magnet, **WALTER C. RAWLS JR.** allegedly opened his pineal gland to not only **see things** within *this* dimension, but beyond it as well.

The following is an excerpt from **DAVID WILCOCK**'s book entitled, "*The Science Of Oneness*:"

***"Walter Rawls, who worked with the effects of monopolar magnetic fields on matter with the late ALBERT ROY DAVIS, told me in a telephone conversation of his experiments with a North pole magnet situated over the pineal gland.***

***A mask was made which held the North pole end of a long cylindrical magnet over the***

***pineal gland. The purpose was to stimulate the gland and see if there was anything to this 'third eye' business. Exposure was in the range of 10-30 minutes per day over a period of about 4 weeks.***

***Within the first week, he was sitting at his desk reading documents when he noticed something move out of the corner of his eye. As he looked up, the ghostly figure of a man had walked through one wall, moved across the room and disappeared through another wall. The figure was totally unaware of Walter. Further exposures to this North pole field took place over a second and third week.***

***The second week, the same ghostly figure moved through the room and glanced toward Walter as he passed through. This time, the figure appeared to have slightly more detail, not quite so ghostly.***

***The third week, while busy working on documents, Walter noticed a change in the room. When he looked up, the wall had dissolved away and he was looking at a small hill where a man and woman sat beneath a tree. It was the same ghostly male figure who he had seen on the other occasions.***

***He sat quit still, watching this pastoral scene for several minutes.***

***The man looked over toward Walter and appeared startled. It was as if he clearly SAW Walter this time and possibly recognized Walter as the ghost that he had seen the previous week! The image faded away and the wall restored to its normal condition. From that moment on, Walter never used the pineal stimulator again."***

Rawls co-wrote a book about magnetism entitled, "*The Magnetic Blueprint Of Life*," with Davis.

In 2007, Wilcock acquired some breakthrough new information regarding the pineal gland. For one thing, the interior of the pineal gland actually has a very similar tissue makeup as that of the eye's retina. Hence, the notion of it being a "third eye" may be FAR more accurate than most people give credit for.

It appears that the gland operates on a very simple process: a barrel-shaped volume of water within the gland, when totally shielded from electromagnetic energy, sound and other shocks from our own space-time, will form a gateway in time-space [there IS a difference between the two].

More blood flows through the pineal gland than any other part of the brain. Witness testimony suggests that we naturally have an electromagnetic shield surrounding the water inside of the gland, and it appears that the integrity of this shield is very, very important.

The usage of drugs like LSD can distort and temporarily deactivate the shield, creating inter-dimensional consciousness effects. The use of such drugs can creates 'cracks' in the protective shield that never go away, and if a person gets too "opened" too quickly, there can be permanent disastrous effects on their sanity and psyche.

In Rawls' case, it seems that a strictly electromagnetic process can ALSO disrupt the pineal gland's shield (albeit temporarily) in the same manner.

One must ponder the effects on the pineal gland if there was to be a magnetic pole reversal. Additionally, how would the hemispheres in our brains be affected by the change in magnetism? The article, "*Pineal Gland Mystique*," states:

***"Attaching a magnet (that sticks by adhesive) to the part of your skin above your 3rd eye (located between your two physical eyes, but slightly higher or slightly above the eyes) for a few hours throughout the day will also stimulate the Pineal Gland and help to decalcify it."***

***"Magnets causes the body to become alkaline, especially that part of the body where the magnet is attached. Any strength (gauss) magnet will work, but only use magnets on the head area during waking hours. The energy from Ra (Sun) will magnify the strength of the magnet's effect on the Pineal Gland."***

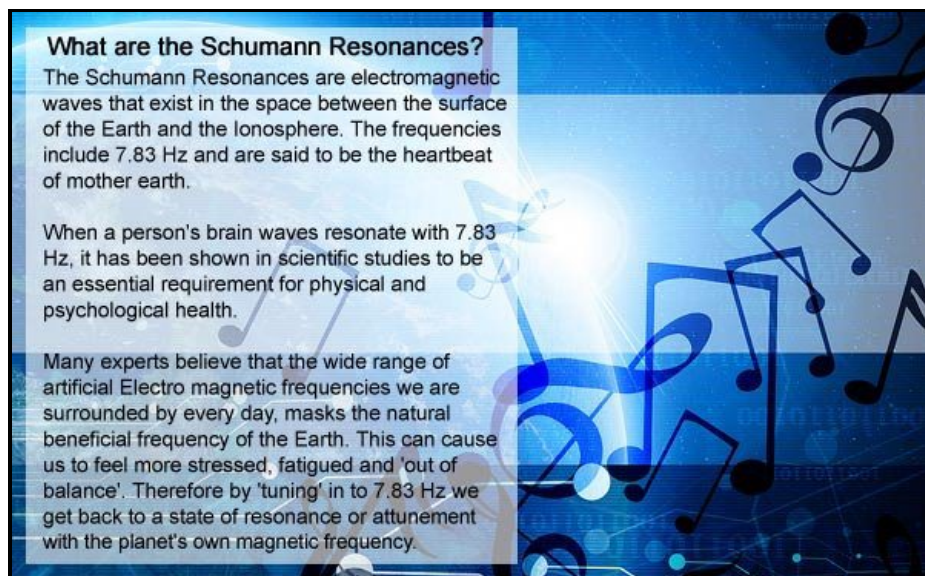

In a **study** regarding the Earth's magnetic field's effect on the pineal gland, it was determined that geomagnetism appears to be one of the environmental conditions which seem to *enhance* pineal activity.

There has been *considerable* interest in the effect of the Earth's magnetic field (EMF) on living organisms, particularly as a direction-finder, and this interest seems to be spreading into much more esoteric fields. It has been suggested that **psi (psychic) ability** and pineal gland activation and sensitivity is related to changes in magnetic field strength.

Putting all these individual pieces together, an intriguing picture emerges, one which suggests that the age-old idea of a **"sixth sense"** may be just that, a sensitivity to the EMF. However, this sensitivity is a *subliminal*.

In other words, CONSCIOUSNESS can be altered when the pineal gland is stimulated through changes in either the electromagnetic or geomagnetic fields.

The **Schumann Resonance** are a set of spectrum peaks in the extremely low frequency (ELF) portion of the Earth's electromagnetic field spectrum. Changes in the earth's magnetic field affect the production of **melatonin** and **serotonin** in the **pineal gland**.

**What are the Schumann Resonances?**

The Schumann Resonances are electromagnetic waves that exist in the space between the surface of the Earth and the Ionosphere. The frequencies include 7.83 Hz and are said to be the heartbeat of mother earth.

When a person's brain waves resonate with 7.83 Hz, it has been shown in scientific studies to be an essential requirement for physical and psychological health.

Many experts believe that the wide range of artificial Electro magnetic frequencies we are surrounded by every day, masks the natural beneficial frequency of the Earth. This can cause us to feel more stressed, fatigued and 'out of balance'. Therefore by 'tuning' in to 7.83 Hz we get back to a state of resonance or attunement with the planet's own magnetic frequency.

**The Bottom Line?** Our *GOAL* should be to find an *energetic balance* with the Earth and Sun, because the more that we become detached from Mother Nature, the more out-of-balance our bodies become. And for our pineal gland to work optimally, both inner *and* outer balance must be achieved.
